OFFICE OF THE REVENUE COMMISSIONER
IN MYSORE.

No. C. 1890/20 -21 Bangalore, 17th November 1920.

FROM

K. R. SRINIVASIENGAR ESQ., M.A.,

Revenue Commissioner in Mysore.

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Revenue *Department.*

SIR,

I have the honour to forward herewith, for the information of Government, copy of D.O. No. 93/ 20-21 dated 15th November 1920 from the Deputy Commissioner of Tumkur reporting on the seasonal conditions obtaining in the District and the action taken by him in the matter.

2. Since the North East Monsoon has been practically a failure, I am writing to the other Deputy Commissioners to submit detailed reports as regards the conditions in their Districts.

3. In view of the representation that was made at the last Dasara Representative Assembly about the grant of remission on account of the failure of wet crops, I have, as personally directed by the Dewan when the subject was discussed at the Assembly, requested the Deputy Commissioners to report in detail the state of wet cultivation under tanks in the several Taluks in their Districts and on receipt of reports from them, I shall make a separate reference to Government in the matter.

I have the honour to be,
Sir,
Your most obedient servant,

Revenue Commissioner

M.B.R.

13

D.O. letter No.93/20-21 dated 15th November 192[illegible] from the Deputy Commissioner, Tumkur District, to the Revenue Commissioner in Mysore.

* * * * * * *

I need hardly write that in this year the rainfall up till now has been very scanty. The Mungar rains not being timely and copious, sowing was retarded in several parts of the District. Subsequent showers were beneficial only to early sowings and a fair harvest can be expected of them. But the late sowings required one or two showers during this month to expect the average yield and in this there is a sad disappointment. While there is some dry crop, there is hardly any wet Karthike crop.

With the exception of very few tanks - three or four at the most - no tank has received any supply of water and it is very unlikely that there will be hereafter heavy rain-falls to ensure supply of water to these tanks and as such Vaisakhi wet cultivation in the District is not hopeful.

The Amildars of Pavagada, Sira, Maddagiri and Kunigal Taluks report that crops are withering in parts of these Taluks for want of rain.

In the Pavagada Taluk, the situation is somewhat worse. The Amildar reports that though water is at present available for men and cattle, it may not last for more than two months and grass, owing to absence of good showers has dried up and consequently apprehends scarcity of water and fodder. He recommends that ryots may be permitted to cut and remove grass from the State Forest free of seigniorage.

The situation seems to require watching and I have directed the Sub Division Officer to tour frequently in these affected parts , report and keep me informed of the

14

situation and conditions prevailing from time to time. I am also going there shortly. Meanwhile I have instructed the Sub Division Officer to throw open tank beds for cultivation of dry and fodder crops.

Grain famine can be contended with. It is somewhat difficult to meet fodder and water famines. I am issuing instructions to all the Sub Division Officers to encourage villagers to dig wells in tanks in time, to save themselves from apprehended water scarcity. Orders will also be issued to see that in tanks wherever there is any water to reserve it for drinking, washing and cleaning purposes and not to use the last drop of water for irrigation purposes.

I may require some amount for sinking temporary wells in tank beds and shall write to you shortly.

Even now the situation is not hopeless. If it rains well in about a week, the situation will be saved. But I am sorry as at present, I cannot hold out any cheerful prospects.

* * * * * * *

" C o p y "

For Revenue Commissioner

M.B.R.

OFFICE OF THE REVENUE COMMISSIONER
IN MYSORE.

C. No. 1890/20-21

Bangalore, 23rd December 1920

FROM

K.R. Srinivasiengar, Esq., M.A.,
Revenue Commissioner in Mysore.

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Revenue Department.

SIR,

In continuation of my letter No.C.1890/G1.20-21 dated the 18th November 1920 forwarding copy of the Tumkur Deputy Commissioner's D.O.No.93 dated 15th November 1920 regarding the seasonal conditions obtaining in his District and stating that another reference will be made to Government on obtaining from the other Deputy Commissioners information as regards the state of wet cultivation under tanks in their Districts, I have the honour to forward herewith copies of the communications received from the Deputy Commissioners on the subject as noted in the margin and to state as follows:--

1. D.O. letters No.H.C.355 dated 19th November 1920 and 24th November 1920 from the Deputy Commissioner, Bangalore District.
2. D.O.No.H.C.331 dated 25th November 1920, from the Deputy Commissioner, Mysore.
3. D.O.No.72 dated 25th November 1920, from the Deputy Commissioner, Chitaldrug.
4. D.O.No.40 dated 3rd December 1920 from the Deputy Commissioner, Shimoga District.
5. D.O.No.106 dated 11th December 1920 from the Deputy Commissioner, Tumkur. and
6. Letter No.C.328 dated 5th December 1920 from the Deputy Commissioner, Kolar.

2. There seems to be no apprehension of failure of wet crops in the Mysore District.

3. In the Bangalore District the rainfall was scanty and insufficient. The Deputy Commissioner states that the existing supply in most of the tanks is not sufficient for the standing

R. C. 4.

From

The *Revenue Commissioner in Mysore.*

To

The Secretary to the Government of
H. H. the Maharaja of Mysore,
Revenue *Department.*

Dated 23rd December 1920.

Despatched 24 —— Rev. Sect.

Received 25 DEC 1920

General No. C. 1890/20 — 21.

Enclosure No. 7

SUBJECT.

Re the state of wet cultivation under tanks in certain Districts.

16

crops and that difficulty may be apprehended with regard to water for cattle especially in Nelamangala and Doddaballapur Taluks if the next Mungar rains do not set in early.

4. Conditions in the Taluks of the Davangere Division in the Chitaldrug District appear to be fairly satisfactory. In the Taluks of the Chitaldrug Division, it is reported that most of the tanks have very little water and that unless there are heavy Mungar showers in March or April, the prospect of the next summer in respect of food, fodder and water may not be encouraging.

5. In the Shimoga District, conditions do not seem to be satisfactory in the Shikarpur Taluk, a few villages on the Dharwar frontier of Sorab and in parts of Honnali and Channagiri. The greatest anxiety is however felt by the Deputy Commissioner only about Shikarpur Taluk where, it is stated, that wet crop has failed in many places and water supply may also give out in some of the villages with the onset of the hot weather.

6. In the Tumkur District, Pavagada Taluk appears to be the worst off, ~~District~~. In the other parts of the District the early sowings of ragi (area being about 30 per cent of the total) are expected to yield 8 to 10 annas and the late sowings not more than 6 annas. It is reported that there is not much cause for anxiety until next summer when, should there be no rains, Water scarcity has to be apprehended. There has been very little of Karthike wet crops under tanks; nor is there any prospect of Vaisakhi crop below them.

7. In the Kolar District, dry crops are reported to be fairly good. Conditions as regards wet crops are fair in the Bowringpet Taluk and elsewhere the prospect of getting either Karthike or Vaisakhi wet crops is very poor.

8. I have not heard yet from the Deputy Commissioners of

Kadur and Hassan. I toured throughout the Kadur District during the past fortnight and found that the conditions were fairly satisfactory throughout the District, that with the exception of a few villages here and there, the outturn of both wet and dry crops in other parts of the District has been fair and though the year cannot be considered to be quite a prosperous one, there is no cause for anxiety in the District.

9. There is at present no scarcity or distress any-where and if we get early Mungar showers, the situation will become considerably easy. Owing, however, to the failure of wet crops under tanks chiefly in the Districts of Bangalore, Kolar and Tumkur, and portions of the Shimoga and Chitaldrug Districts, it is likely that there will be a demand for partial remission of wet assessment in these Districts. I have called for full information in this respect from the Deputy Commissioners and on receipt of their replies, I shall submit a separate report in the matter.

I have the honour to be,

S i r,

Your most obedient servant,

Revenue Commissioner.

B.R.

18

D.O. letter No.H.C.355/20-21 dated 19th November 1920, from the Deputy Commissioner, Bangalore District, to the Revenue Commissioner in Mysore, Bangalore.

I am in receipt of your D.O. letters Nos.C.1864 and 1890, dated the 13th and 17th instants, respectively, about the present, seasonal prospects and supply of water to tanks, I have called for immediate information from the Sub Division Officers and Amildars and on receipt of their reports, will submit my report to you.

Regarding the throwing open of tank beds for the raising of quick-growing crops, I have to say that the situation has not become so acute as to require any remedial measures at present as the recent few showers have eased the situation to some extent; but there is no objection to throw open the tank beds for cultivation now, so as to enable the ryots to take advantage of the moisture in the soil, when it is most beneficial to them instead of doing so later on, when the chances of reaping full benefits from it, become remote.

" C o p y "

For Revenue Commissioner.

B.R.

D.O. letter No.H.C.355/20-21 dated 24th ~~December~~ November 1920 from the Deputy Commissioner, Bangalore District, to the Revenue Commissioner in Mysore, Bangalore.

In continuation of my D.O. letter No.H.C.355 of the 19th instant re the present seasonal conditions, I write to say that the rainfall in the District up-to-date has been 23 inches and 3 cents as against the ten years average of 31 inches 17 cents. It was scanty and insufficient throughout the District and did-not bring in an adequate supply of water to the tanks. Even should there be some more showers, there is little chance of the tanks receiving their full supply. The existing supply in most of the tanks is not sufficient for the standing crops. Some difficulty may be apprehended with regard to water for cattle especially in Nelamangala and Dodballapur Taluks if the next mungar rains do not set in early.

Owing to the insufficiency of water in the tanks the yield from the paddy crop is not likely to be above 8 annas. The ragi crop is good on the whole, and this together with the fact that the last year's harvest was also good leave no cause for anxiety as regards the staple food. Rice, however, may have to be imported from abroad. No difficulty is likely to be felt on account of fodder.

On the whole it appears to me that there is no room for anxiety and the situation does not necessitate the introduction of any measure of relief at present. The tank beds may however be thrown open for cultivation.

" C o p y "

For Revenue Commissioner.

B.R. RNS

W

D.O. letter No.H.C.331 of 20-21 Rev. dated 25th November 1920 from the Deputy Commissioner, Mysore District, to the Revenue Commissioner in Mysore, Bangalore.

In reply to your D.O. letter No.C.1890/20-21 of 17th November 1920, regarding the state of affairs as regards the supply to tanks, and prospects in respect of food, fodder and water, I write to say that from the reports up till now received, and from what I observed during my tours, there does not seem to be any apprehension of failure of crop due to the deficiency of supply of water. Standing wet crops including paddy under tanks are in good conditions.

No report has been received as regards the Nagamangala Taluk but there was a good shower of 1 - 7 I. C. on the 17th instant and there has been drizzling for the past 3 days in that Taluk also.

There does not therefore seem to be any necessity for throwing open tank-beds for cultivation and if in any individual case it should seem to be desirable, I shall take needful action.

" C o p y "

Rudrappa

For Revenue Commissioner.

B.R.

U

D.O. letter No.72 of 20-21 dated 25th November 1920 from the Deputy Commissioner, Chitaldrug District, to the Revenue Commissioner in Mysore, Bangalore.

In reply to your D.O. No.C.1890 of 20-21 dated 17th November 1920, calling for certain information re the state of affairs in the several Taluks of the District as regards supply to tanks and the prospect of the next summer in respect of food, fodder and water, I write to say that the Sub Division Officer, Davangere, reports that all the Taluks in his Sub Division except Hosdrug are well off as regards supply of water to tanks and even in Hosdrug, a few of the big tanks having larger atchkats of wet lands under them have received good supply of water and are nearly full and there is nothing alarming regarding the conditions during the next summer in the matter of food grains, fodder and water in this Sub Division. I concur with his opinion. The Sub Division Officer, Chitaldrug, reports that most of the tanks in his Sub Division have very little water which may last for a month or two and unless there are heavy mungar showers in March or April, the wet cultivation will suffer materially under a great number of tanks and in consequence the prospect of the next summer in respect of food, fodder and water may not be encouraging.

Permission will be granted to cultivate tank beds wherever necessary in the Chitaldrug Sub Division.

" C o p y "

Rudrappa

For Revenue Commissioner.

B.R. 1/12

D.O. letter No.40 dated 3rd December 1920 from the Deputy Commissioner, Shimoga District, to the Revenue Commissioner in Mysore, Bangalore.

In reply to your letter No.C.1890of 20-21 dated 17th November 1920 regarding supply in the tanks, I enclose herewith copies of reports received from the Amildars of Sorab, Shikarpur and Honnali in the matter. The area affected by the failure of the North East Monsoon is very small in the Sorab Taluk being confined to less than a dozen villages on the Dharwar frontier and on the whole, I should say that the Taluk will not occasion much anxiety in the coming hot weather.

The Honnali Taluk has suffered much from the failure of the North East Monsoon but as it has had a fair (though not good) dry crop I anticipate no serious difficulty in regard to food or fodder but water scarcity may be feared in some villages of the Belaguthi Hobli. The same remark applies to about six villages of the Kumsi Sub Taluk bordering on that Hobli.

My greatest anxiety is about Shikarpur Taluk. Here wet crop failed in many places and it is neither usual nor possible in that Taluk to try late dry crops on lands where paddy has failed. Water supply also may give out in some of the villages with the onset of the hot weather, and to meet the situation we have a programme ready for sinking temporary wells out of District Funds. The Amildar also fears that in the later months the supply of food grains may be affected but I do not yet share his anxiety on this head. There is no difficulty about fodder.

I am sorry I have not yet received the reports of the Amildars of Channagiri and Shimoga nor the remarks of the Shimoga Sub Division Officer even on such an important reference. I shall sent them as soon as I receive them. Roughly it may be

P.T.O.

taken that the remarks about Honnali Taluk apply also to the two Talukas referred to above.

" C o p y "

For Revenue Commissioner.

B.R.

23

D.O. letter No.106 dated 11th December 1920 from the Deputy Commissioner, Tumkur District, to the Revenue Commissioner in Mysore, Bangalore.

In continuation of my D.O. letter No.93 dated the 15th November 1920 and in reply to yours of the 17th November 1920 regarding the seasonal prospects, I write to inform you that I toured during last month in almost all the parts of the District and also made enquiries about the conditions prevailing in those and other parts.

2. Pavagada Taluk had comparatively less rain-fall during the year - only a third of the average - and the supply of water to the tanks was very small. Both big and small tanks have little water in their beds. Irrigated Ragi cultivation was carried on to some extent and the yield was about 8 annas; gram and other dry crops cannot be expected to be satisfactory for want of sufficient and timely rains. At the most, the yield may not be more than 4 annas. Water and fodder are for the present available and much difficulty is not experienced to secure them. But about a couple of months hence there may be every likelihood of there being scarcity for water and fodder in these parts and it may be necessary to sink wells in tank beds. Special provision is to be made for the necessary funds to undertake the sinking of these temporary wells for which a separate reference will be made.

3. The other parts of the District are not so bad as Pavagada. With regard to the early sowings of Ragi, the average yield is 8 to 10 annas and this area is not more than 30 per cent of the total. The late sowings have suffered much for want of rains and the return cannot possibly be more than 6 annas. Fodder for cattle and water for men and cattle are at present available and until next summer there does not seem to be much cause

P.T.O.

for anxiety when, should there be no rains water scarcity has to be apprehended. Tanks did not receive sufficient supply of water to raise Karthike wet crops below them and even in places where there has been wet cultivation (which is very little) the return is very poor. Such being the case it is highly improbable that there can be any Vaisakhi crop below these tanks.

4. The Sub Division Officers in the District have been instructed to give tank beds for temporary cultivation of quick-growing food and fodder crops and some of them have intimated of their having done so.

5. In all the Taluks it has been made known that those who want hay, may cut and bring from Bukkapatna State Forest where the District Forest Officer tells me a large quantity of grass is available and store from now paying only a nominal fee of one or two annas per cart load, more for statistical purpose than as a revenue. As yet none has come forward to apply for the concession.

6. There are on hand scattered all over the District about Rs.80,000/- minor irrigation and District Fund works and if wanted within about a month, I can have projects (minor irrigation) for another 60 to 80 thousand Rupees works. Should a necessity arise there is that big new tank work of Nidasale, Kunigal Taluk and also many major tanks and their canals requiring earth-work so that work can be found for unskilled labour. On the whole the District is in a position to meet the situation (which God forbid should arise) without haste and without panic.

7. The present is not alarming and the apprehended water and fodder scarcity will to a great extent be averted by early sharp mungar showers.

" C o p y "

For Revenue Commissioner.

B.R.

Letter No.C.298 dated the 5th December 1920 from the Deputy Commissioner, Kolar District to the Revenue Commissioner in Mysore, Bangalore.

With reference to your D.O. letter C.1890/20-21 dated 17th November 1920 calling for a report regarding the state of affairs in the several Taluks of this District as regards supply of water to tanks and the prospect of the next summer in respect of food, fodder and water, I have the honour to state that till now, only the Amildars of Bowringpet, Malur, Bagepalli, Chintamani and Mulbagal have submitted their reports in the matter.

D.O. reminders have again been sent to the remaining officers and on receipt of their replies, a detailed report will be submitted.

From the reports received, it is observed that excepting in the Bowringpet Taluk, most of the tanks have not received a sufficient supply of water for wet cultivation and the prospect of getting the Karthika and the Vaisakhi paddy crops is very poor. In the Bowringpet Taluk, the Amildar estimates that an average a six anna paddy crop might be realised.

In almost all the Taluks, the dry crops have been good and are expected to yield a good harvest and there is thus generally no apprehension of any shortage of food, fodder and water next summer, except probably rice, for which there might be a keen demand and the prices also might rise if the supply from outside the District becomes also insufficient.

The Amildars are generally of opinion that the beds of tanks which contain no water may be thrown open for the cultivation of the quick growing food and fodder crops. I would think it very necessary that early orders should be passed in the matter. I would add that it might be made a condition that the villagers be made liable for the assessment only when the sowing results in a good crop and they might be assured that otherwise the assessment would be remitted.

12.3.24.

Commissioner of Kolar thinks that the situation does not warrant the granting of remissions. He states that the dry crops this year have been good, that on the whole the condition of the agriculturists has not been depressing, that the economic outlook of the ryots is satisfactory and that the wet crop this year is not a total failure. My information is that in parts of the Mulbagal and Srinivasapur Taluks the conditions are not quite satisfactory. But as the Deputy Commissioner considers that no concessions are required anywhere in his District his opinion may be accepted.

2 The Deputy Commissioners of Mysore, Hassan and Kadur Districts consider that the conditions in their Districts are fairly satisfactory and that no concessions are called for and I agree with them.

3 As regards the Tumkur District, remission of half the wet assessment in the Pavagada Taluk and suspension of revenue in the Ittikadibbanahalli and Mudigesihalli hoblis of Maddagiri Taluk and Gowdagere and Hulikunte hoblis of Sira Taluk are recommended by the Deputy Commissioner. The Deputy Commissioner of Shimoga recommends remission of half the wet assessment in 364 villages of Sorab, Hohhali, Shikaripur and Shimoga Taluks and Kumsi Sub Taluk as detailed in his letter. Seeing that last year both the wet and dry crops were fairly good and that this year the dry crops were fair and fetched good prices, I do not think that a good case is made out for the grant of remission in either of these Districts. I am of opinion that it should be sufficient if the collection of half the wet assessment on tank-fed ~~k~~ lands is suspended for one year in the Taluks which have fared very badly as reported by the Deputy Commissioners. I accordingly beg to recommend that in the case of wet lands under tanks in the marginally noted tracts only half

1. Pavagada Taluk.	Whole of the Taluk	the wet assessment for
2. Maddagiri Taluk	Ittikadibbanahalli & Mudigesihalli hoblis.	the current year may be collected now and
3. Sira Taluk	Gowdagere and Hulikunte hoblis.	that the collection of
4.Shimoga Taluk	190 villages referred to in the Deputy Commissioner's report.	other half may be suspended for a period

5. Shikaripur Taluk	154 villages referred to in the Deputy Commissioner's report.	of one year so that it may be

collected along with the next year's khists.

The total amount of revenue thus suspended may be estimated at about Rs. 75.000./-

4 In addition to the general suspension proposed in respect of the tracts mentioned above, I beg also to recommend that the Sub Division Officers may also be empowered to grant similar suspensions of half the wet assessment under tanks in deserving individual cases on the application of the parties concerned in the Taluks of Bangalore, Hoskote, Devanhalli and Doddaballapur Taluks in the Bangalore District, Mulbagal and Srinivasapur Taluks in the Kolar District and Sorab and Honnali Taluks in the Shimoga District.

I have the honor to be,

Sir,

Your most obedient servant,

Revenue Commissioner.

Enc-2.

Office of the Deputy Commissioner,
Bangalore District.

D.O. Dated Bangalore, 15th February 1921.

No. C.1864/20-21
FEB 1921

Dear Sir,

I have received your D.O.letter No.C.1864/20-21 dated 13th/14th instant, regarding the remission and suspension of land revenue this year.

I send enclosed two statements, one showing the particulars of water supply to tanks in the several Taluks of the District and the other showing the probable out-turn of wet and dry crops for the current year as compared with last year.

It will be seen from these statements that the conditions are not bad, especially as both wet and dry crops were particularly good last year. Judging from my general knowledge of the District, I do not think it necessary to sanction any remission of assessment this year either wet or dry. But the Sub Division Officers may be empowered to grant suspension of a half of wet assessment in cases where

the land yielded nothing.

Yours sincerely,

M. A. Narasimhachar.

M. A. Narayana Rao
Deputy Commissioner
Bangalore District

Statements sent separately by registered post. C.1864/21

CONFIDENTIAL.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE
No. C.1864/21
FEB 28 1921

Deputy Commissioner's Office,

Kolar District.

D. O. 410/C

Dated Kolar the 22nd February 1921.

Dear sir,

With reference to your D. O. letter No. C. 1864/G1. of 1920-21 dated the 15th November 1920 ---- calling for statements showing the supply of water to -- tanks and the condition of wet cultivation under them -- during them, year only I beg to forward herewith the statements received from the several Taluks of the District.

Sent by Cycle 23.2.21.

From the reports received, it is clear that the extent of wet cultivation and the outturn this year is much below the mark compared with that of normal years. But dry crops have been uniformly very good. It may be -- safely assumed that ordinarily every raiyet possesses wet and dry lands together. So that, what he loses by way of failure of wet crops if any has been made up by the --- success of the dry crops and the high prices that generally

generally prevail in the market.

It is also seen from the statements that -- in the Taluks of Kolar, Bagepalli and Sidlaghatta a -- very large extent of the wet area is grown with dry crops. This may be taken to be true of almost all -- other Taluks also, though in the case of some this -- has not been explicitly mentioned in the Statements.

As regards the question of remission, the situation does not appear to me to warrant any. For one thing, the dry crops this year have been good. Dry and wet crops have both been good last year though in the year previous wet crops had been partially --- affected. On the whole the condition of the Agriculturists has not been depressing. The economic outlook of the raiyets is satisfactory. The wet crop this year is not a total failure.

Under the foregoing circumstances, I do not see any necessity for the granting of remissions or for suspensions of revenue anywhere in the District.

I

37

I have also consulted my Sub Division Officers and -- they are also of my opinion.

Some more particulars about the wet crops of the Srinivaspur Taluk are still due, and they will be furnished shortly.

Yours sincerely,

M Gahiruddin Khan

Dated the 18th February 1921.

Despatched.

General No.
No. T.R. 83.
Enclosure. Nil.

Reporting on the supply of water to tanks and the condition of wet cultivation under them in Tumkur District.

-----0----.

Office of the Deputy Commissioner,
Tumkur District,
Dated Tumkur, 18th February 1921.

From

Ananda Rao S, Sirsi., Esquire., B.A., LL.B.,
Deputy Commissioner, Tumkur District.
Tumkur.

To

K.R. Srinivasiengar, Esquire.,M.A.,
Revenue Commissioner in Mysore,
Bangalore.

Sir,

Referring to your D.O. letter No. C. 1864/GL. 20-21 dated the 13/15th November 1920 regarding the supply of water to tanks and the condition of wet cultivation under them, I have the honour to state as follows:-

During the current year, rainfall was scanty in all parts of the District-being only a half of the average for the past ten years. In the Pavagada Taluk, it was even less being so low as about a third of the average. Only a very few tanks - two in a hundred - received good supply of water and the rest did not receive sufficient supply for wet cultivation.

2. In this District, it is generally the Vaisaki Paddy (Summer) that is grown, Karthika (Winter) wet crop is rarely raised and even if it is done, it is only where water is available from Kapile wells or Talapariges and the extent of land so brought under cultivation is so little that it may be left out of consideration.

3. Taking wet crop in the District as a whole- except the Vaisaki Paddy sown late last year and harvested in the early part of the current year under some big tanks, it is a very -----

very negligible quantity.

4. With respect to dry crops, the District average may be taken as ~~to~~6 to 8 annas and in places where there were early sowings, which does not form more than a third of the cropped area, the yeld is more than 8 annas and in some places it even goes up to ten annas.

5. In Pavagada and parts of Maddagiri and Sira Taluks bordering on British Territories, owing both to scanty rainfall and uneven distribution, the average yield of dry crop was less than in other places being about 4 annas, The places which have sufferred in this way are the whole of Pavagada Taluk, Ittikadibbanahalli and Midigesi Hoblies of Maddagiri Taluk and Hulikunte and Gowdagere hoblies of Sira Taluk. It is commonly taken that where the rainfall is about half of the average and fairly well distributed, the crop is also about half of the average yield. Applying this standard, Pavagada Taluk which had only a third of the average should be taken to have sufferred the most and in fact, it is the only Taluk which stands in need of consideration. A statement showing the average rainfall and rainfall in 1920 is appended in the margin.

Name of place.	Rainfall in 19-20.	Average.	Remarks.
Tumkur Taluk.	21. 26.	30. 50.	
Kunigal Taluk.	17. 66.	32. 12.	
Gubbi.Taluk	17. 71.	35. 91.	Average for past ten years.
Tiptur Taluk.	14. 04.	24. 42.	
Chickanayakahalli Taluk.	17. 29.	28. 91.	
Maddagiri Taluk.	18. 24.	29. 97.	
Sira Taluk.	16. 76.	24. 36.	
Pavagada Taluk.	8. 17.	24. 67.	
Koratagere Sub Taluk.	16. 70.	28. 31.	
Turvekere Sub Taluk.	15. 63.	31. 69.	
Ittikadibbanahalli of Maddagiri Taluk.	10. 45.	24. 07.	
Midigesi. do-.	12. 03.	24. 73.	
Bargur of Sira Taluk.(Hulikunte hobli).	9. 59.	21. 56.	Average for past four years.

6. Going to the question of remission or suspension of Revenue, the policy adopted is to allow the same when there.

there is a partial or total failure or destruction of the crops throughout any tract on account of drought or any other cause - coupled with the fact that the tract is already impoverished or the previous harvests have been poor.

7. Considering that the District had a good crop last year and the agriculturists realised high prices for their wet and dry crops, it cannot be said that the District with the exception of Pavagada Taluk stands in need of any consideration. The case of Pavagada Taluk is a peculiar one. It is a Taluk where the people are generally poor. Rainfall even in a good year is small and rarely well distributed. It is a place subject to frequent droughts and the agriculturists are in a state of chronic poverty. Taking all these circumnstances into consideration, it is necessary that this Taluk should be shown some consideration this year. As it has been the policy of Government hitherto, only to grant half remission in the case of wet crops in the years of drought, I would recommend that in the case of wet crops whatever may be the source of irrigation, this concession of remission of half the wet assessment may be shown to all the villages of that Taluk.

8. The total wet assesment of the Taluk comes to about Rs. 21,000/- and the amount to be remitted will not exceed Rs. 11,000/-.

9. It is a point for consideration of Government, whether it is not desirable to adopt the Bombay Rule of granting suspension of Revenue in the years of distress. If that commends itself, I would recommend that in the case of Ittikadibbanahalli and Midigesi hoblies of Maddagiri Taluk and Gowdagere and Hulikunte hoblies of the Sira Taluk, the concession of suspension of half the assessment on wet lands may be shown.

I have the honour to be,
S i r,
Your most obedient servant,

Deputy Commissioner,
Tumkur District.

K.R.Srinivasa Iyengar, Esq.,M.A.,
Revenue Commissioner in Mysore,
Bangalore.

Sir,

In continuation of this office No.R.H.C.381 of 20-21 dated 6/10th January 1921, I have the honor to enclose herein the statement received from the Sub Division Officer of Nanjangud regarding the supply of water to tanks in the Gundlupet Taluk, and the conditions of wet cultivation under them.

On perusal of the Sub Division Officer's report, it would appear that he held the Jamabandi of the villages referred to in the enclosed statement and that no petitions for remission of assessment were presented by the villagers. In these circumstances, it seems that there is no need for granting any remission in the Gundlupet Taluk.

I have the honor to be,

Office of the Deputy Commissioner,
Hassan District,
Dated Hassan the 7th January 1921.
8th

Dear Sir,

In acknowledging receipt of your D.O.Reminder letter No. C. 1864/G1. of 1920-21 dated 29th ultimo, I write to inform you that as yet statements showing the supply of water to tanks and the state of wet cultivation thereunder have been received only from the Amildarsof Manjarabad ~~Taluk~~ and Hole-Narsipur Taluks and the Deputy Amildar of Alur Sub Taluk and they are herewith submitted for perusal.

The Amildar of Manjarbad Taluk submits, that Manjarabad being a malnad Taluk the wet crops there are not entirely dependent on tank water. Owing to the rainfall not being inadequate during the year, the yield of wet crops has been reported to be from 8 to 12 annas in the rupee and consequently the Amildar submits that no remission of wet assessment is required to be granted to any of the wet lands in the Taluk.

In the Hole-Narsipur Taluk, it is reported, that very few tanks have received full supply of water during the year. Nevertheless the yield of wet crops under tanks has been from 4 to 12 annas in the rupee. It is submitted that in the case of tanks which did not receive timely supply of water the ryots in some places have arranged to grow miscellaneous crops such as Black Gram, Coriander etc., which fetch two or three times the income usually derived from the wet crops and in other places the lands have been made fit for the growth of Kar paddy etc., Such being the case the holders of wet lands in this Taluk have, in no way, sustained loss owing ~~owing~~ to the inadequate supply of water to tanks late in the year. It is reported that no necessity has arisen in this Taluk also for granting remission of wet assessment .

The Sub division Officer, Hassan, reports that all the tanks in the Alur Sub Taluk received a fair supply of water during the year and the wet cultivation thereunder was also good and that no case has been made out for the grant of the remission of wet assessment in that Sub Taluk. The reports submitted by the Sub division Officers of Hassan and Hole Narsipur and the Amildar of Manjarbad Taluk on the subject are herewith enclosed for perusal. In concurring with the views of the above officers I submit that with regard to wet lands under tanks in the above Taluks there seems to be no necessity of granting remission of wet assessment.

With regard to information required from other Taluks I have sent an urgent 3rd reminder to the Amildars concerned. On receipt of their reports I shall address you again on the subject.

Yours sincerely,

B. Lakshmana Rao

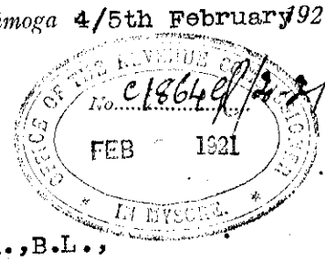
OFFICE OF THE DEPUTY COMMISSIONER,
SHIMOGA DISTRICT.

Dated, Shimoga 4/5th February 1921.



From

S. Hiriannaiya, Esquire, M.A.,B.L.,
DEPUTY COMMISSIONER,
SHIMOGA DISTRICT.

To

K. R. Srinivasiengar, Esquire, M.A.,
Revenue Commissioner in Mysore,
Bangalore.

Sir,

With reference to your D.O. letter No.C.1864/Gl.1920-21 dated the 15th November 1920, I have the honour to forward herewith the reports received from the Sub Division Officers, and Amildars furnishing information about the supply of water to the tanks, and the state of wet cultivation below them.

(1) Sorab Amildar's report No: C.1188 dated 10th December 1920.
(2) Honnali Amildar's Camp No: 1 dated 9th December 1920.
(3) Shimoga Amildar's report No: 425 dated 29th January 1921.
(4) Shikarpur Amildar's report No:415 dated 18th January 1921.
(5) Shimoga Sub Division Officer's No: H.C.278 dated 31st December 1920 about Kumsi Sub Taluk.

The enquiries were confined to the marginally noted taluks or portions of taluks where the seasonal conditions were not satisfactory. The lists pertaining to the taluks of Sorab, Honnali, Shimoga, Shikarpur, and the Kumsi Sub Taluk, indicate that relief is necessary in the undermentioned areas, while the conditions in the Channagiri Taluk are not

Honnali
Channagiri
Sorab (Maidan parts)
Shimoga
Shikarpur
Six villages of Kumsi Sub Taluk.

so bad as to require special concessions:--

Sorab Taluk:- Eleven villages bordering on the Dharwar District as detailed in the report.

Honnali Taluk:- Six villages in the Belagutti and Sasvehalli hoblis.

Shimoga Taluk:- One hundred and ninety villages, bulk of them relating to Kasaba, and Bhadravati hoblis.

Shikarpur Taluk:- One hundred and fifty four villages mostly in Udagani, Kasaba, and Talagunda hoblis.

Kumsi Sub Taluk:- Seven villages as detailed in the enclosed report.

2. The Sub Division Officer of Sagar recommends that a remission of half the wet assessment may be given in respect of all wet lands where the estimated outturn is not more than four annas. This proposal would involve a loss of revenue of nearly Rs 80,000/- against a total wet assessment of --- Rs 5,17,463/- in the above mentioned taluks, while on the other hand, if the grant of remission is to be restricted only to cases where the lands have not been cultivated at all, or where the crops have totally failed (as was done during the year 1918-19), the probable amount of half the wet assessment to be written off would come to Rs 50,000/- nearly.

A statement showing the total wet assessment as well as the entire land revenue of the taluks concerned as well as the total amount of remission under either of the above calculations is attached.

Considering the general agricultural depression of the year as well as the large number of relinquishments in the past few years, I am of opinion that unless Government have otherwise any objection, remission of half wet assessment in the case of wet lands in the above mentioned areas where the outturn of crop was not more than four annas may be sanctioned.

3. Before concluding, I feel, I must once again bring to

the

570

the notice of Government the urgency of carrying out new irrigation works in the taluks of Shikarpur and Shimoga. The seasons have been particularly unpropitious in these two taluks continuously for five years and there has been an appreciable shrinkage in the area under wet cultivation. There has been a noticeable decrease in the area under sugarcane which is a favoured crop in the Shikarpur Taluk. The people have been hit hard and I beg to recommend that the construction of the Anjanapura and Ambligola tanks and the repairs to the Salur Channel in the Shikarpur taluk and the improvement of the supply to the tanks in the Kasaba hobli of the Shimoga Taluk may be investigated and if feasible sanctioned at a very early date.

I have the honour to be,

Sir,

Your most obedient servant,

Deputy Commissioner,

for Shimoga District.

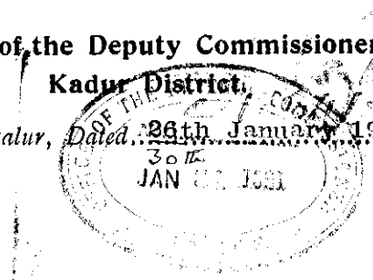
S. Narayana Rao
Deputy Commissioner
Shimoga Dist

D.O. No. MC 224 Sec.3. 20-21

Office of the Deputy Commissioner,
Kadur District,

Chikmagalur, Dated 26th January 1921.



Dear Sir,

As called for in para 3 of your D.O. letter No.C.1864/ 1920-21 of the 13th November 1920, I enclose herein a statement containing the particulars under each of the tanks in the Koppa Taluk and in the Narasimharajapur Sub Taluk and under each of the Major Tanks in the Tarikere Taluk. Similar particulars in respect of the minor tanks in the Tarikere Taluk have been called for and will be submitted on receipt. From the information furnished under "State of crops" and from a comparison of the figures under "Total area under occupation" with that of "Area cultivated it is considered that the question of remission of wet assessment for 1920-21 does not arise, as regards the atchkat under the tanks included in the statement. The average yield in annas is poor in the case of the lands under Tarikere Doddakere but this is because some of the lands at the tail end did not get a sufficient supply of water and water was unauthorizedly taken for a few dry lands which were not entitled to it, to raise wet crops thereon.

2. As regards the statement for the three Taluks comprised in the Chikmagalur Sub Division, the Sub Division Officer, -- explains in his letter dated the 20th instant(copy enclosed) that particulars from Taluks of Chikmagalur and Mudigere have not been received. He however considers that there will be no reason for remission of wet assessment. I have requested him to -- expedite the submission of the prescribed statements. On their receipt they will be forwarded.

Yours sincerely,

Ramachandra Rao

To

K.R. Srinivasa Iyengar,Esq.,M.A.,

Revenue Commissioner in Mysore,
BANGALORE

RSM

D.O. letter No.S.H.C.366/20-21 dated 20th January 1921, from the Assistant Commissioner, Chikmagalur Sub Division, to the Deputy Commissioner,Kadur District.

====

I beg to acknowledge receipt of your D.O. letters regarding the supply of water received by tanks in the Sub Division.

I have so far received the report of only the Kadur Amildar and this I enclose for perusal. The reports of the other Amildars have not been received.

I beg to point out that the report called for is of the result of "a thorough enquiry in the course of the Taluk Jamabandi" made personally by the Amildar. As the Deputy Commissioner is aware the Taluk Jamabandi has not yet been completed in any of the three Taluks. This perhaps is the reason why the Chikmagalur and Mudigere Amildars have not reported yet.

For this reason also the Kadur Amildar's report based on the Sheikdar's reports does not seem to meet the object in view. It is also not complete as information regarding the Yegati Hobli is not furnished in it.

I am reminding the Amildars to expedite their reports and shall submit a further report in the matter when I have received information from them.

In the meanwhile I may say that neither in Mudigere Taluk nor in Chikmagalur Taluk there has been failure of rains such as would make a remission of the assessment necessary.

In regard to Kadur Taluk also I hold the same view. The tanks I saw recently in Kadur Taluk in Kasaba and Yegati Hoblies had a fair supply of water. The Amildar's report also shows that there has been an average 3 anna crop on the wet lands during the year.

Kadur District.

OFFICE OF THE REVENUE COMMISSIONER
IN MYSORE.

C. No. 1864/Gl. 20-21 Bangalore, 4th April 1921.

FROM

K. R. Srinivasiengar, Esqr., M.A.,
Revenue Commissioner in Mysore.

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Revenue *Department.*

SIR,

In continuation of my letter No.C.1864 Gl.20-21 dated 11th March 1921 regarding the concessions to be shown in view of the adverse seasonal conditions during the current year, I have the honour to forward herewith copy of Chitaldrug District Deputy Commissioner's D.O. letter No.71 Rev 20-21 dated 28th March 1921 together with its enclosure in original. The Deputy Commissioner does not recommend the grant of any concessions for any of the Taluks in the District excepting Hosadurga, in respect of which Taluk alone he says that some relief by way of suspension of half the assessment may have to be granted. A statement showing the supply of water to the tanks in the District and the extent of cultivation under them is herewith attached. I am of opinion that instead of a wholesale suspension of revenue for the whole Taluk it will be sufficient if, as suggested by me in the last para of my letter referred to above the Sub Division Officer in charge of the Taluk is empowered to grant suspensions of half the wet assessment for one year in deserving individual cases on application by the parties.

I have the honour to be,
S i r,
Your most obedient servant,

Revenue Commissioner.

REV. SECT.

General No. C. 1864/20 — 21

Enclosure No. Three

SUBJECT.

Reporting on the seasonal conditions of the year in the Chitaldrug District.

D.O. letter No.71 Rev.20-21 dated 28th March 1921 from the Deputy Commissioner, Chitaldrug District to the Revenue Commissioner in Mysore, Bangalore.

In reply to your D.O. No.C.1864/G1. 20-21 dated 15th November 1920 and subsequent reminders re the supply of water to tanks and the state of wet cultivation under them, I send herewith the statements received from the several Amildars containing the particulars of wet cultivation under each of the tanks in the District and extracts of opinions received from the Sub Division Officers.

As regards Hosadurga Taluk, I am of opinion that some relief by way of suspension of half the assessment may have to be granted. As the information furnished was meagre, further information has been called for and on receipt of which another communication will be made

No relief is called for in regard to other Taluks.

" C O P Y "

Revenue Commissioner.

T.K.N.

Extract of opinion furnished by the Sub-Division Officer, Davangere (Vide His. No. S.C.175 Rev. 20-21, Dated 12-1-21).

X X X X X

Para 2. The state of crops in the Taluks of Davangere, Holalkere, Jagalur and in the Sub-Taluk of Harihar is reported to be on the whole good and the yield is expected to be between 8 to 12 annas.

Para 3. The wet crops under most of the tanks in the ---- Hosadurga Taluk are reported to be withering for want of ---- sufficient water in the tanks. The Bagayat crops are said to be in a good condition.

Para 4. It is believed that there is no necessity under the circumstances to grant remissions as regards wet crops in this Sub-Division except possibly in the Taluk of Hosadurga.

X X X X X X

Extract of opinion furnished by the Sub-Division Officer, Chitaldrug (Vide his memo No. H.C.235/20-21 dated 25-2-21.).

X X X X X X

As all the tanks have received sufficient water and one crop has been taken, there seems to be no necessity for any remission being granted.
